ELSEVIER

Comput. Methods Appl. Mech. Engrg. 118 (1994) 423–424

Computer methods in applied mechanics and engineering

Contents Volume 118

Volume 118, Nos. 1–2, September 1994

A family of single-step Houbolt time integration algorithms for structural dynamics
J. Chung and G.M. Hulbert 1

An iterative solution strategy for boundary element equations from mixed boundary value problems
T.J. Urekew and J.J. Rencis 13

Note on the von Neumann stability of explicit one-dimensional advection schemes
B.P. Leonard 29

Chebyshev pseudospectral multi-domain technique for viscous flow calculation
H.H. Yang and B. Shizgal 47

An efficient and locking-free anisotropic plate and shell triangular element
J. Argyris and L. Tenek 63

Numerical analysis of compound jet disintegration
B.M. Tchavdarov, P.D. Minev and S.P. Radev 121

Analysis, approximation, and computation of a coupled solid/fluid temperature control problem
M.D. Gunzburger and H.C. Lee 133

Finite element approximation of an evolution problem modeling shear band formation
D.A. French and S.M.F. Garcia 153

An improved one-point integration method for large strain elastoplastic analysis
L. Stainier and J.Ph. Ponthot 163

A particle method for history-dependent materials
D. Sulsky, Z. Chen and H.L. Schreyer 179

The application of automatic differentiation to problems in engineering analysis
S. Chinchalkar 197

Volume 118, Nos. 3–4, October 1994

Numerical techniques for the treatment of quasistatic viscoelastic stress problems in linear isotropic solids
S. Shaw, M.K. Warby, J.R. Whiteman, C. Dawson and M.F. Wheeler 211

Bubble stabilization of spectral Legendre methods for the advection-diffusion equation
C. Canuto and G. Puppo 239

Stress resultant geometrically nonlinear shell theory with drilling rotations—Part I. A consistent formulation
A. Ibrahimbegović 265

Stress resultant geometrically nonlinear shell theory with drilling rotations—Part II. Computational aspects
A. Ibrahimbegović and F. Frey 285

Basis of an improved hybrid node renumbering algorithm for matrix bandwidth reduction
D.G. Scott and R.P.S. Han 309

Finite element solution of compressible viscous flows using conservative variables
A. Soulaïmani and M. Fortin 319

Multigrid acceleration for recirculating laminar and turbulent flows computed with a non-orthogonal, collocated finite-volume scheme
F.S. Lien and M.A. Leschziner 351

On the convergence of a discrete Kirchhoff triangle method valid for shells of arbitrary shape
M. Bernadou, P. Mato Eiroa and P. Trouvé 373

A shear deformable plate element with an exact thin limit
F. Auricchio and R.L. Taylor 393
